Snapshot of the European ESG FinTech environment - Unlocking the Potential of Frankfurt

December 2024

The European (ESG) FinTech scene continues to face significant hurdles - including risen energy prices, inflation, high interest rates in addition to ongoing geopolitical uncertainty

In addition, the overall slow recovery of the economy puts further pressure on equity financing

⁴⁴The Financial sector continues to play a key role for the sustainable transformation of the economy as it has direct impact on capital allocation and consumer behavior

- We have seen growing demand for sustainable finance from both private and institutional investors
- Regulators introduced relevant policies like the EU Corporate Sustainability Reporting Directive
- "Environmental"-related products and services remain in the top spot with 77% of all analyzed companies, followed by "Social" (40%) and "Governance" (40%)
- Current figures are a mix of 2023 data as well as a preview of our 2024 findings

Recap, Outlook and Observed Market Trends

ESG FinTechs will also experience new opportunities and challenges in 2025

- Germany led the ESG FinTech landscape with four funding rounds in Q1 2024, highlighting its pivotal role in sustainable financial technology initiatives.
- ▶ There is a shortage of late-stage deals, with no Series C and D deals in the first half of 2024¹.
- The European Commission's Corporate Sustainability Due Diligence Directive (CS3D), implemented in July 2024, mandated financial institutions to reassess their operations and global value chains, emphasizing comprehensive risk management.
- European business schools intensified the incorporation of sustainability into their curricula, driven by the continent's leadership in climate policies and renewable energy, preparing graduates to tackle ESG challenges effectively.
- The adoption of blockchain technology gained momentum, with FinTech firms exploring its potential for transparent and efficient ESG reporting and compliance.
- Financial institutions continued to grapple with the collection and analysis of reliable ESG data, presenting opportunities for FinTechs offering innovative data solutions.
- Outlook for 2025: The ESG FinTech sector is poised for growth, with expectations of heightened regulatory scrutiny, technological innovation and leverage of AI solutions, and increased integration of ESG considerations into financial services across Europe.

Recommendations to help Frankfurt's ESG FinTech ecosystem unfolding its full potential amidst positive examples and generally favorable framework conditions

- On a macro level, a change of perspectives in the following three dimensions is needed to help European ESG FinTechs / Solutions Providers to unleash their full potential:
 - **Change in framework conditions** too much regulation hinders international scalability
 - Allocation of capital channeling of funds into business models with measurable impact
 - Integration of standards harmonization of rules and scope
- Leverage Proximity to Key Institutions: Capitalize on Frankfurt's closeness to entities like the International Sustainability Standards Board (ISSB) and the Green and Sustainable Finance Cluster Germany to foster collaboration and innovation in ESG standards.
- Engage with ESG-Focused Accelerators and Innovation Hubs: Participate in programs, which support sustainable finance initiatives and provide valuable resources for ESG FinTech startups like Techquartier.
- Address Funding Gaps: Organize investor roundtables, exemplified by events like the Impact Festival, to bridge funding gaps for ESG FinTechs and facilitate connections between startups and potential investors, particularly in later stages.
- Facilitate Access to Financial Services Clients: Connect ESG FinTechs with local financial services clients seeking innovative solutions to meet evolving regulatory requirements, fostering mutually beneficial partnerships.
- International Awareness: Cohesive international promotion of Frankfurt as an ESG hub aligned and streamlined marketing by all stakeholders.
- Leverage Momentum: Supported by the recent COP29 conference in Baku, it has been emphasized that financial institutions must prioritize their ESG efforts. The significance of the financial services industry in confidently driving global climate action has been highlighted. These factors contribute to the high demand for ESG FinTechs capable of addressing these challenges.
